

## New tractor "Kyiv-14102" of domestic production at AGRO 2017

**Tractor of domestic production "Kyiv-14102" with a number of important improvements was presented by Ukravtozapchastna at the AGRO 2017 in Kiev.**

AGRO 2017 took place at the Expocenter of Ukraine from June 7 to 10. Ukravtozapchastna presented a new tractor of domestic production, "Kyiv-14102" (model of 2017 year).

The tractor got another design of the front part. The enlarged radiator grill holes minimize the possibility of overheating the engine. By the way, the motor is installed more powerful, turbo-charged - 105-strong D-245-174. The headlights of the European model moved to the top. Transmission - 18-step, with the possibility of hidropnyzhvalnoho gear, which increases the number of transfers twice.

The cabin has improved noise and dust insulation. The standard air conditioner is installed; it will soon change the climate control system. As an option, you can put a seat on the pneumatic suspension. The dashboard also received an improved design.

The rear hydroswitch is equipped with additional cylinders, which in pairs with the main cylinder have a load capacity of 2200 kg, which is 1,8 times more than in the base model. Load-carrying capacity on the axle of the lower link hinges is 3200 kg. Overall dimensions of the tractor: length - 3930 mm, width - 1970 mm, height - 2780 mm. Operating mass - 3910 mm.
